HIV/AIDS STI Prevention & Treatment

No.1: highly ranked condom that gained the trust of the Lao people

With 20 years of quality and long-lasting support for our society, Number One condom is highly ranked and trusted in Laos. It is a bestseller that adheres to international standards, which gives confidence to its distributors. In order to increase network sales and revamp brand image, a new packaging and advertising campaign has been deployed. The new campaign includes ads on Sun Awning, and stickers on pharmacy counters in 4 provinces including Khammuan, Savannakhet, Champasak, and Vientiane Capital. Positive response received from the distributors and consumers has increased trust in the product and led to an increase in sales.

Malaria Case Management

The private sectors is ready to eradicate Malaria cases in the 5 southern provinces

In order to eliminate Malaria by the year 2030, in accordance to the national strategy, PSI Laos collaborated with specialists from the Centre of Malaria, Parasitology and Entomology (CMPE) and other partners to hold several workshops at the district health office in 35 districts of the 5 southern provinces including Savannakhet, Salavan, Champasak, Sekong, and Attapeu. The agenda included a review key concepts about conducting check-ups, providing treatment, protection of materials, forwarding cases of PV & Mix from private to public hospitals and a modern method of reporting incidents to pharmacies and private clinics that are part of the PPM network along with the provincial coordinators, district health officers, and health specialists from each district to effectively combat malaria cases and become more up to date. Through the revision of concepts during these workshops, the participants - namely pharmacies and private clinics - have developed a better understanding of the guidelines for which compliance has increased to 95-100%, based on the results of the post-workshop assessment.

WOMEN'S HEALTH PROJECT

Thoroughly supporting all areas of family planning

From the 28th-30th of September 2020, PSI Laos collaborated with public sector partners to lead activities aimed to develop technical strength for doctors from private clinics in family planning service, with a special focus on the 14 specialists from clinics in PSI's network, to expand the system of service extensively for both private and public sectors. Additionally, there was another activity to inform and increase knowledge on the different methods of family planning available to women. The three days of activities that took place at hospitals in Savannakhet and Champasak, a total of 181 women came in for family planning services including: Intrauterine device (IUD) for 55 women, contraceptive implant for 89 women, contraceptive injection for 3 women, birth control pills for 4 women, condoms for 16 women, and other services for the remaining 14.

NON-COMMUNICABLE DISEASES

A step towards success in tackling Diabetes in Lao PDR

After conducting research and participating in an iterative process with specialists from the MoH department of health care to complete the National Training Modules on Type 2 Diabetes, gestational diabetes and hypertension. was officially endorsed on the 18th of September 2020. Dr. Buathep Phumin, deputy chief of the department of health care, led the ceremony. The board of specialists who helped develop the guideline handbook for all three diseases, directors from all four central hospitals, and specialists from others Departments around Ministry of Health participated in the official agreement and announcement of the handbook in order to endorse it on a central and local level to ensure its use in future trainings.
